

DIPLOMA OF INFORMATION TECHNOLOGY

Diploma in Information Technology Application aims to deliver basic software development and network management knowledge. It provides a solid basis for graduates to start their career or further studies. Topics will cover web applications development, network and system management techniques.

The Diploma in Information Technology is a one academic year program that prepares graduates with the knowledge, skills and competencies needed to enter an exciting career in Information Technology. After completing this hands-on diploma program, graduates will possess a foundation in information technology (IT) and evolving computing practices and methods.

The Diploma of IT program enables students to:

- Build a strong foundation in information technology
- Develop skills applicable to the rapidly changing computing industry
- Learn through integrating applied real-world experiences
- Build knowledge, skills and capabilities aligned to the requirements of leading international IT bodies

Graduates are well positioned to support of Information Technology processes. Students engage in hands-on experiential learning through applied assignments and a required IT work placement. Graduates are well positioned to launch their career in IT.
