

**PROFESSIONAL MASTER'S DEGREE OF
FINANCIAL SCIENCE AND INVESTMENT MANAGEMENT**

Enhance your capabilities and expertise in finance and investment management, and be equipped to apply best practice across a wide range of industries.

Volatile markets, changing demographics, emerging technologies, and increases in retirement savings, public sector debt and geo-political risks. The need for specialist knowledge to face these emerging challenges has never been greater among banks, superannuation, insurance and the public sector.

During this specialist master's degree, you'll gain exposure to innovative investment strategies involving both traditional and alternative asset classes.

By analysing real case studies and working on industry projects, you'll learn how to apply your understanding of:

- financial modelling
- portfolio management
- derivatives
- fixed income
- public sector financing
- equities

Career possibilities

- Investment manager
- Investment analyst
- Risk manager
- Market risk manager
- Finance manager
- Financial adviser
- Investment banker
