

PROFESSIONAL DOCTORATE OF ACCOUNTING

The professional PhD in Accounting focuses on advanced research and in-depth study in accounting and related topics. The program aims to develop professional leaders who possess deep knowledge and exceptional skills in research, analysis, and teaching across various areas of accounting. The professional PhD in Accounting typically includes advanced studies and research in managerial accounting, auditing, financial analysis, financial reporting, taxation, financial management, accounting policies, and more. The program allows students to work on their own research, develop a deep understanding of complex accounting concepts, and contribute to the field's knowledge by conducting original research and publishing results in recognized scientific journals. Earning a professional PhD in Accounting is a significant step for those seeking further specialization and professional development in accounting, whether they aim for a career or work in the private or public sector in leadership or consulting roles.
